

DEVELOPMENT PHASE 2

REFINE + TEST

FROM INITIAL SLIDES TO A MORE USABLE TEMPLATE SYSTEM

PROGRESS SUMMARY

This week I continued developing Classroom & Beyond by completing the first design pass for Product 01: Daily Classroom Slides and creating nine designs for Product 02: Project & Assignment Slides. Product 02 now includes a cover, overview, objectives and requirements, inspo/example slide, timeline, progress tracker, rubric, and final submission/reflection.

THE EDUCATOR TEMPLATE KIT

TURN IDEAS INTO IMPACT

PROJECT & ASSIGNMENT SLIDES

PLAN | GUIDE | SUPPORT | SHOWCASE

WHAT'S INCLUDED

01		PROJECT OVERVIEW Introduce the project, goals, and big picture.
02		OBJECTIVES + REQUIREMENTS Clearly outline expectations and deliverables.
03		TIMELINE / CHECKPOINTS Keep students on track.
04		PROCESS / WORK SESSIONS Organize each phase of the project.
05		INSPIRATION & EXAMPLES Provide visuals and references.
06		PRESENTATION TEMPLATE A clean layout for student presentations.
07		REFLECTION What did you learn? What's next?

FULLY CUSTOMIZABLE

Edit in Canva to fit your subject, project, or grade level.

CONSISTENT DESIGN

Keeps your classroom materials cohesive and professional.

BUILT FOR REAL CLASSROOMS

Flexible layouts that work for creative, academic, and CTE projects.

PROJECT OVERVIEW

THE BIG PICTURE

PROJECT TITLE

DUE DATE
MM / DD / YYYY

Good Ideas Take Work

PROJECT DESCRIPTION

Write a brief overview of the project. What will be creating, researching, or exploring?

DRIVING QUESTION

What is the main question or goal of this project?

REAL-WORLD CONNECTION

How does this project connect to the real world, a career, or your community?

FINAL PRODUCT

What will you submit or present at the end? (Be specific.)

HOW YOU'LL BE ASSESSED

Your work will be evaluated using a rubric that looks at creativity, effort, process, and final product.

KEY DATES

THE PROCESS

TOOLS + WORKFLOW

DEVELOPING CONSISTENCY WHILE MANAGING A TEACHING WORKLOAD

TOOLSET

CANVA Primary design platform for building and organizing the editable template system making it easily customizable.

MICROSOFT WORD Used for documenting the weekly development process.

WORKFLOW

01 Review the Product 01 slide set.

02 Develop Product 02's first visual pass.

03 Select layouts to recreate in during project assignment slides.

04 Check type, spacing, colors and usability.

05 Collect educator feedback and identify revisions.

WHAT WORKED

Using the established sage, white, and blue visual system helped Product 02 feel connected to Product 01. Developing the layouts as a coordinated set also made it easier to see which project pages teachers might need or use most.

WHAT DIDN'T

The hardest part this week was balancing development with my teaching workload was the biggest challenge. I could develop/envision visual layouts faster than I could actually build every layout in Canva. Since school just began it has become increasingly hard to stay on track and stay consistent.

PIVOT

My priority has been figuring out time slots best to work on the product and ensuring that the most useful layouts are created and check whether they are easy for another educator to customize.

REFLECTION + FEEDBACK

WHAT I LEARNED

TESTING, REFINEMENT + WHAT COMES NEXT

USER FEEDBACK RECEIVED

I shared the templates and received feedback.

Teacher 1: "I like the clean, modern design and how easy the slides are to follow. I would suggest adding more space for longer instructions and learning targets."

Teacher 2: I like that all the templates have a consistent style and could save time when planning. I would still need a quick guide on how to customize everything in Canva which could make the kit even more useful."

CHANGES BASED ON FEEDBACK

Based on the teacher feedback, I plan to create more flexible layouts with additional space for longer instructions and information. I will also develop a short getting started guide to help teachers easily customize the templates in Canva.

MOST PROUD OF

I am proud that the kit has expanded beyond daily lesson slides into a coordinated project and assignment set. The visual identity feels consistent across the two products, and the new layouts address multiple stages of a classroom project.

STILL TO IMPROVE

I need to continue creating the editable Canva pages, review readability and customization. I also need to manage my time more efficiently to ensure that all pages of the design are created and checked before product launch.

NEXT STEP

Finish rebuilding and refining Products 01 and 02 in Canva, apply documented educator feedback, and begin the editable layouts with clear instructions for Week 5.

INSPIRATION + EXAMPLES

SEE WHAT'S POSSIBLE.

EXPLORE | ANALYZE | GET INSPIRED | MAKE IT YOUR OWN

Good Design Starts Somewhere.

EXAMPLE 01

Poster Design

Notice the bold typography and use of contrast.

EXAMPLE 02

Social Media Graphic

Look at the clean layout and color palette.

EXAMPLE 03

Magazine Cover

Notice the composition and use of imagery.

EXAMPLE 04

Photography + Type

See how text and photos work together to tell a story.

THINK ABOUT:

- What do you like about these examples?
- How do they connect to your project?
- What elements could you incorporate?
- How can you make it unique to your voice?

REMEMBER

- ✓ You don't have to copy.
- ✓ Use these as a starting point.
- ✓ Combine ideas.
- ✓ Make it your own.

OBJECTIVES + REQUIREMENTS

WHAT YOU'LL DO.

Details Today Progress Tomorrow

LEARNING OBJECTIVES

By the end of this project, you will be able to...

Objective 1: Type your learning objective here.

Objective 2: Type your learning objective here.

Objective 3: Type your learning objective here.

Objective 4: Type your learning objective here.

PROJECT REQUIREMENTS

Your final submission must include...

Requirement 1: Describe what students need to include.

Requirement 2: Describe what students need to include.

Requirement 3: Describe what students need to include.

Requirement 4: Describe what students need to include.

Requirement 5: Describe what students need to include.
